

GREEN BUILDING TOUR

Historic furniture, bookshelves, and period fixtures were restored and refurbished.

Windows, skylights, and a rooftop clerestory allow natural light to flow through the building.

Cisterns buried in Nameless Field hold 75,000 gallons of stormwater runoff.

More than 120 tons of metal shelving were recycled.

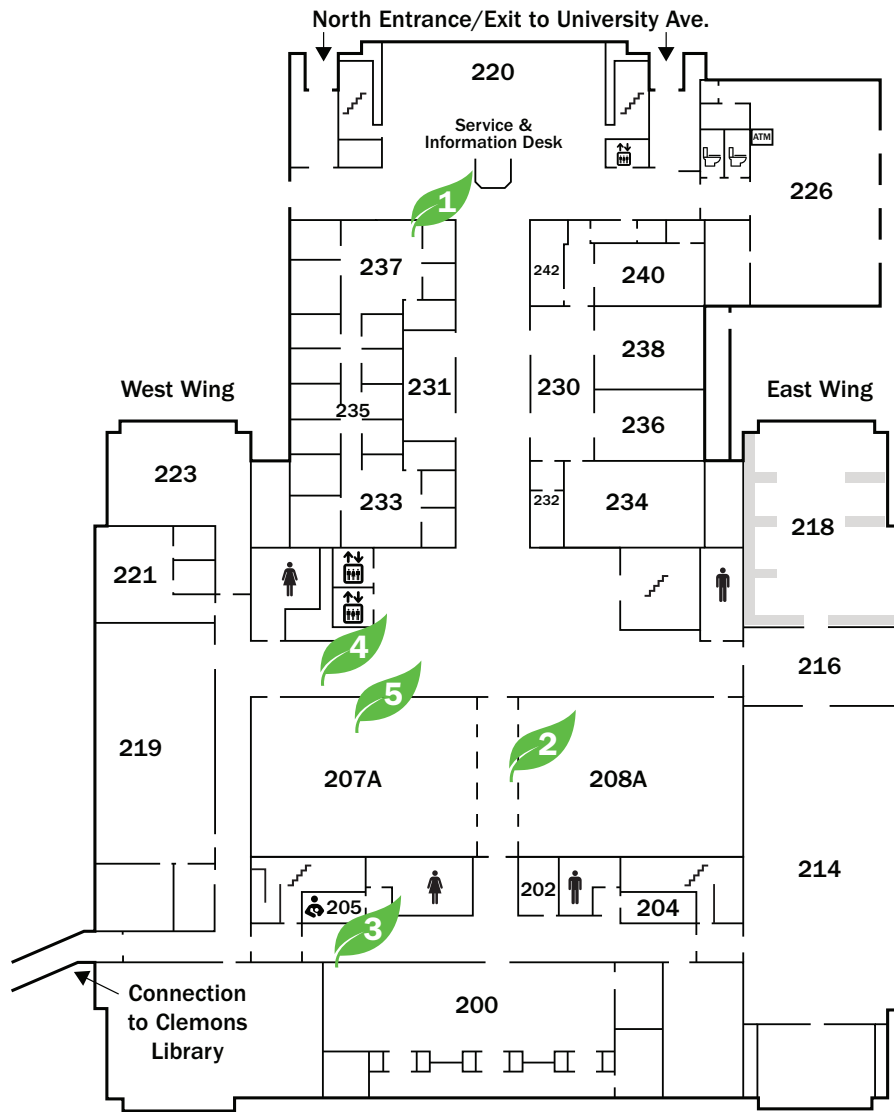

THE EDGAR SHANNON LIBRARY

Shannon Library is a LEED Gold-certified building, promoting excellence in energy efficiency and sustainability. The library has numerous features designed to minimize environmental impact and support resource conservation.

Take this self-guided Green Building Tour to visit ten stops on the second and fourth floors and learn more about the sustainability features of Shannon Library.

SECOND FLOOR

1. Active Transportation
2. Natural Lighting
3. Inclusion, Diversity, Equity, and Accessibility
4. High-Efficiency Design
5. Ongoing Waste Management

FOURTH FLOOR

6. Historic Preservation
7. Low-Impact Materials
8. Stormwater Management
9. Improved HVAC Systems
10. Reuse and Recycling During Construction
